## **DETAILED ACTION**

### ***Response to Amendment***

The examiner is in receipt of applicant's response to office action mailed 11/8/2002, which was received 2/7/2003. Acknowledgement is made that no claims have been amended, cancelled or added. Applicant's arguments have been carefully considered, but were found not to be persuasive. Therefore the previous rejection is restated below.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Danknick, and further in view of Official Notice.**

Danknick teaches all the features in the instant claims such as consumable items being monitored and ordered automatically over a network, but does not specifically mention the following features:

In regards to claims 4,5 and 7, Danknick teaches ordering parts, but does not specifically mention the authorization features of the instant claims. The Examiner notes that implementing levels of authorization for automated parts ordering is old and well known in the art. It would have been obvious to a person of ordinary skill in the art to include in Danknick the authorization features as taught in the instant claims, because this would limit the purchasing authorities and provide a set of rules for spending a companies money during the purchasing process.

In regards to claim 1, 6, 18, 19 and 20, Danknick teaches ordering for a peripheral device, but does not mention using the specific ordering features of the instant application such as: providing an order location, providing an electronic shopping cart list, placing an order for the consumable with a reseller using the personal computer, automatically placing the ordering response to notifying the user and prior to placing the order, querying a user to authorize placing the order with an identified seller. It was old and well known at the time of the invention of Danknick to provide the features noted above to electronic commerce systems that provide for ordering parts or services over the Internet. Since the features were readily available, it would have be obvious to one skilled in the art to include in the ordering portion of the invention Danknick, providing an order list, providing an electronic shopping cart list, placing an order for the consumable with a reseller using the personal computer, automatically placing the ordering response to notifying the user and prior to placing the order, querying a user to authorize placing the order, because these feature would add increased functionality and provide a more friendly user environment.

### ***Response to Arguments***

Applicant's arguments have been carefully considered, but were found not to be persuasive.

Applicant argues the examiners use of Official Notice and requests that prior art be presented. In response to this request the examiner provided s the following:

- Levels of authorization for automated parts ordering – Katz (page 29, para. 667)
- Providing an order location – Isaacson et al (2002/0019778) teaches placing a purchase request for toner cartridges that includes a shipping address/location to be sent. (page 3, para.'s 42, 51 and page 4, para. 64)
- Providing an electronic shopping cart list – Isaacson teaches an electronic shopping cart list (page 3, paragraph 42, and FIG 4C)
- Placing an order with a reseller using the personal computer – Katz et al (US 2002/0065950) teaches placing an order with a reseller using a personal computer (page 1, para. 2, and page 5, para. 66)
- Automatically placing the order for the consumable in response to notifying the user – Katz (page 5, para.'s 69-75)
- Prior to placing the order, querying a user to authorize placing the order with an identified reseller – Isaacson, (page 2 para.'s 14 and 15, page 3, para.'s 42, and page 5, para. 75)

Applicant also argues that Danknick does not teach or suggest:

- Receiving a notification from the computer peripheral device via a messaging system of a need to order a consumable – FIG 20
- Alert a user of the personal computer of the notification – Fig 20 alerts the user and see using a personal computer to order the parts above, see also figure 4.
- And provide an order location to the user for the consumable – See order location above.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
